Nighttime Soil Borings Scheduled for Pensacola Bay

Chipley, FL – Construction crews will begin nighttime soil boring work adjacent to the Pensacola Bay Bridge beginning Wednesday evening, Oct. 19. The work will not impact traffic and noise is expected to be minimal.

Soil samples obtained from the borings will provide bridge designers important information about subsurface conditions. Construction of the new \$398.5 million Pensacola Bay Bridge is scheduled to begin in spring 2017.

All activities are weather dependent and may be delayed or re-scheduled in the event of inclement weather.

For more information on the Pensacola Bay Bridge replacement project, visit www.nwflroads.com, or follow the Florida Department of Transportation District Three on Twitter @myfdot_nwfl.
